Tuesday, 19 November 2024

- 10:00-10:10 **9. Opening of the 2nd Day with Welcoming Words**
- 10:10-11:00 **10. Presentation “Academic Recognition Practitioners’ Experience with Digital Solutions and Artificial Intelligence for Mobility and Recognition of Qualifications”**
- Discussion with the audience
- 11:00-12:30 **11. Parallel Workshops**
- A: “From Campus to Career: Redefining Equity, Access & Success in Higher Education in the Digital Age”**
This workshop explores how institutions can redefine access and success to meet the needs of diverse student populations in the digital age. In today’s fast-evolving digital landscape, higher education must adapt to welcome students from all backgrounds and prepare them for careers that demand not only technical skills but also adaptability and resilience. Speakers representing different stakeholders will share regional insights on equity, access, success in higher education and explore the role of policymakers in this area together with the workshop participants.
- B: “Transforming Education and Skills Development for the Digital Age”**
This session will explore how education systems and institutions must adapt to meet the challenges and seize the opportunities presented by the digital age. The discussion will focus on reimagining curricula, developing future skills, and fostering cross-regional collaboration. The participants are encouraged to address the critical aspects of transforming education and skills development in the digital age and share insights and develop strategies for building future-ready educational systems.
- C: “Five Key Steps for Lifelong Learning in a Knowledge Based Economy: Learning Capital Accumulation in Context”**
We sometimes view lifelong learning and skills acquisition as a linear process, mirroring a perception of formal education that starts with basic literacy and numeracy skills, with the learner gradually ascending a ladder that could end with a PhD or a medical degree. Learning is far more complex, with very many interdependencies, all of us are constantly learning what could be categorised as both lower and higher level knowledge and skills. This workshop breaks with the simple linear model for understanding how we gain, accumulate and leverage our learning. It is framed around five capitals of learning: seed capital, identity capital, cultural capital, social capital and human capital. Each contributes to our knowledge and skills portfolios. The capitals are interdependent and essential for an individual to fully function in a knowledge based economy. The concepts explored in this workshop can help policymakers, administrators, teachers and learners formulate a more holistic and impactful approach to lifelong learning, including TVET and skills programmes.
- 12:30-14:00 *LUNCH*
- 14:00-14:15 **11. Reporting from the Workshops**
- 14:15-15:15 **12. Updates from the ASEM Stakeholders**
Stakeholders are invited to present the current state of play of their relevant activities, projects and initiatives carried out and implemented since the ASEM Education Ministers’ Meeting (ASEMME9, January 2024). Each speaker has about 5 minutes.
- 15:15-15:45 **13. Looking towards SOM1, SOM2 and ASEMME10**
The ASEM Education Secretariat together with the hosts of the meeting taking place in 2025 and 2026 present the next steps towards the 1st and 2nd Senior Officials’ Meeting and the 10th ASEM Education Ministers’ Meeting. The Senior Officials will discuss and agree on the topics and way forward.
- 15:45-15:55 **14. AOB**
- 15:55-16:00 **15. Closing Remarks**
- 16:00 ***Social Programme and Formal Dinner: Visit to the Sai Suddha Nobhadol Building Museum and traditional Thai dinner at the Rajabhat Suan Sunandha University.***
